

## OGDENITES WIN SIGNAL HONORS

I. S. Noall Gets Federal Job;  
G. S. Sanders to  
Succeed Him

I. S. Noall, formerly of Ogden and for some time employed in the state school offices, has been granted a full-time position by the state board of education to become field agent for the federal board of vocational training in charge of continuation or "part-time" school work. George S. Sanders, who has been head of the manual training department of the Ogden high school, will succeed Mr. Noall in the state offices.

Mr. Noall's thorough will be effective March 1.

Mr. Noall is well known in Ogden having been the first supervisor of part time and vocational schools before coming to the state school offices. In Utah he has been supervisor of vocational education in trades and industries under the Smith-Hughes act, and in that capacity has won distinction which now, "then" once, has brought him flattering offers from other agencies. In his new position he will have headquarters at Washington, and his duties will be to formulate a program for the training of teachers in vocational education in trades and industries, to assist state trainers of such teachers, and generally to help work out programs for part-time schools in different sorts of communities where the districts may be in need of some generalized experience.

Mr. Sanders, the new supervisor named yesterday, has been in close touch with the work of the department in trades and industries, and also in the matter of teacher training, and it is believed will carry on the work of the office without interruption.

The meeting of the state board was a special one, called primarily for the purpose of considering a report of the special committee on requirements for certification of teachers, appointed at the October meeting. The special committee reported at the regular January meeting, but attendance at that time was so small that the committee asked that the report be over for a time. The report was adopted yesterday.

## ANTI-FRATERNITY ACT UNDER ATTACK

SPRINGFIELD, Ill., Feb. 16.—An attack on the validity of the high school anti-fraternity act, was made in the Sangamon county circuit court today in a suit filed by Bert Sutton in behalf of his son, a student at Springfield high school.

The court was asked to restrain the board of education from expelling the boy from school because he belongs to a fraternity.

The suit for injunction grew out of recent agitation by a group of citizens who demanded that the anti-fraternity act be enforced in Springfield.

American musical comedies are not popular in Mexico.

The Emergency fleet corporation launched 2312 hulls.

BETTER THAN A MUSTARD PLASTER

## OGDEN MAN AT RATE HEARING

H. L. Herrington Testifies  
Concerning Utah Can-  
ning Situation

WASHINGTON, Feb. 16.—The canning industry of Utah is being ruined by high freight rates, a number of plants have been forced out of business and the output of the remainder has been greatly reduced, H. L. Herrington, president of the Utah Canning company of Ogden and chairman of the tomato division of the National Canners' association, testified yesterday before the interstate commerce commission.

SHOPS ADVANCES

He was placed on the stand by H. W. Prickett after the commission had been shown a tabulation descriptive of how freight rates had been advanced on Utah goods since 1918. On the basis of rates in effect up to June 24, 1918, the tabulation showed an average annual shipment of 694 carloads to all markets outside Utah with an average annual haul of 833 miles and with an average annual weight of 40,188,927 pounds. The freight charges amounted to \$261,909. By August 25, 1920, the freight charges had been advanced to \$254,852 and the freight shipments to date since that time to \$327,169.

The average revenue for each car on these shipments was \$233.96 in 1918, \$267.22 in 1920 and \$471.43 on the present basis. The average revenue for each car mile rose from \$23.29 in 1918 to \$41.59 in 1920, and is now \$53.39.

TRACES GROWTH

Mr. Herrington showed the development of the canning industry in Utah from its infancy in 1888 to 1920, when there were thirty-four factories. With an invested capital of \$3,172,493, H. L. Herrington said, Utah in 1920 shipped the following numbers of pounds of canned goods:

Peas, 17,824,271; tomatoes, 12,229,508; mixed goods, 5,529,288; cherries, 425,070; apricots, 293,894; pork and beans, 282,510; peaches, 16,900; cat-soup, 237,625; apples, 115,960; tomato puree, 2,401,180; pears, 55,884; sauerkraut, 503,280; total, 45,225,770.

He continued: "Canned goods packed in Utah during 1920 amounted to 1,507,605 cases, or 29,571,186 cans. In addition to the above there were packed 30,000,000 cans of milk."

"During the year 1920 there was paid: To farmers for canning crops, \$297,782; for wages by canners, \$510,770; wages paid by farmers producing crops, \$224,885; wages paid by can companies producing cans and cases, \$135,000; for farmers for cans, \$381,287; by canners for cases, \$304,037; by canners for labels, \$105,791; total, \$2,860,264."

RATES CUT OUTPUT

"The canners shipped in 1920 amounted to 775 cars, shipped to 151 cities in thirty-one states."

"Actual figures from the tomato acreage alone, grown by the Utah Canning company in 1920, shows that the railroad companies received \$197.87 an acre for transportation charges, alone for each acre produced by that company. On this basis, the tomato acreage alone in Utah gave the railroads close to \$500,000 in revenue for transportation."

"This consideration must be given to canned foods to this extent, that when the cost to the consumer reaches a point beyond a certain price the consumption decreases, and in lieu thereof home canning becomes an extent is resorted to, thereby resulting in a reduction of railroad revenue."

"The high freight rates have decreased production in Utah very materially. The tomato acreage dropped from 2365 acres in 1920 to 616 acres in 1921, or 74 per cent less in 1921 than in 1920."

"The entire pack of all canned foods in Utah dropped 50 per cent in 1921 under the year 1920, due to a considerable extent, to increased freight rates. My explanation of this is as follows."

CANNERS LOSS BUSINESS

"On August 26, 1920, the freight rates advanced. At the close of the packing season, October 15 of that year, we found we were unable to move but a small portion of the 1920 pack. Consequently we were forced to carry into 1921 the major portion of 1920 packs. If the rates had not been advanced we would have been able to dispose of a considerable portion of the 1920 pack in distant markets and not confined the sale to home territory, which could not consume the year's pack, all of which resulted in reduced acreage in 1921."

"The company of which I am president and manager for several years sold one large order of tomato products at a point south of the Atlantic seaboard, as much as fifty cars yearly, but when the freight rate advanced from 78 cents to \$1.04 the business was lost entirely. Another Utah packer who sold tomato buyers also lost his former business with them. A large portion of this business went to California and was shipped by way of the Panama canal."

"If Utah for 1922 will be curtailed to a great extent—several canning companies have gone into the hands of receivers, some will not run at all, and those that do operate will not do so to capacity."

REDUCE NORMAL PACK

"Our products are all contracted for from the growers in the early spring. The amount of acreage contracted by us is influenced to a great extent by the prospects of disposing of same. If we were assured at this time that a reduction in freight rates would be made, which would apply to this year's pack, we would increase our acreage of canning crops."

"But if the present basis of high freight rates is to be maintained, we can get nothing but loss if we pack to exceed 50 per cent of normal."

"Not to exceed 35 per cent of our normal pack can be marketed in Utah and adjoining states; consequently, 65 per cent of our products must find markets in more distant states."

"Experience has taught us that when once the consuming public ceases to eat an article of food on account of price it requires considerable educational advertising to get the consumer back into line again. This cannot be accomplished in a day or a year; it is a slow process of education or reeducation."

Mr. Herrington testified that conditions in Idaho are even worse than in Utah.

## BOYS' BODIES FOUND IN COAST SNOWDRIFT

LOS ANGELES, Calif., Feb. 16.—Members of a searching party returning here told of finding in the snowdrifts in the mountains between Mt. Lowe and Mt. Wilson, 20 miles north of here, the bodies of Wilbur P. Lane and Ben Mustaine, Los Angeles high school boys, reported lost more than two weeks ago.

The boys had started for a ranch but were caught in the recent record snow storm.

At one time the boys thought they had escaped the perils of the storm, as shown by a note the searchers found in a mountain cabin.

## TRADE BUREAU QUESTION AIRD

Daugherty Outlines Their  
Relation to National  
Anti-Trust Law

WASHINGTON, Feb. 16.—Activities of trade associations do not contravene the provisions of the Sherman antitrust laws, in the view of Attorney General Daugherty, unless in actual practice they develop enhanced prices, suppressed competition or retarded production. This ruling of Mr. Daugherty, expressed informally and tentatively, was made public Wednesday by Secretary Hoover who had inquired of the attorney general as to the legal limit within which trade associations could properly operate in connection with the publication of trade statistics gathered by such organizations.

Mr. Daugherty said that the Sherman act was not intended to prevent the use of trade names and phrases which could be obtained, if standards of quality, grade, quantity, etc., could be arranged, if information could be handled, if co-operative advertising could be engaged in, if legislative questions affecting a particular industry could be handled, and if statistics showing production, distribution and wages could be collected from its members and compiled for the information of the secretary of commerce.

Mr. Hoover inquired further if a trade association could engage in any or all of these activities provided there was no intent to hide some agreement to actually restrain trade or otherwise violate the antitrust laws.

TENTATIVE REPLY

With regard to the first question, Mr. Daugherty declared there was no apparent objection to a standard system of cost accounting, but associations should be warned to guard against uniform cost as to any item of expense and suggested the elimination of a part of one question as to the propriety of an association furnishing trade marks for its members.

"I can see nothing illegal in the exercise of the other activities mentioned," Mr. Daugherty said, "provided always that whatever is done is not used as a scheme or device to curtail production or enhance prices and does not have the effect of suppressing competition. It is impossible to determine in advance just what the effect of a plan, when put into actual operation, may be. This is especially true with reference to trade associations, whose members are vitally interested in advancing, or as they term it, stabilizing prices, and who through the medium of the association, are endeavoring to secure personal contact with each other."

"Therefore, the expression of the view that the things enumerated by you, with the exceptions stated, may be done lawfully, is tentative, and if in the actual practice of any of them it should develop that competition is suppressed or prices are enhanced, this department must treat such a practice as another which is violative of the antitrust act."

USED AS DISGUISE

Discussing the advocacy of trade associations for progressive economic organization, Mr. Hoover told Mr. Daugherty he was, nevertheless, aware that an impression existed with a small minority that individual prohibited acts might be accomplished "under the disguise" of such an organization.

"However," Mr. Hoover said, "to make any point clear regarding the trade associations, the existence of which I advocate, I desire to say that I have always taken the view that no body of men could combine in the form of a trade organization to do any act or thing forbidden by law if they were undertaken by them outside of a trade organization."

The character of trade organizations, the existence of which should be recognized, is one that carries legal purposes only in its articles of association; its activities must be in harmony with its declared purpose.

The articles of association, which should be declared purposes, must not be used as a mask to hide unlawful purposes.

CUT THIS OUT—IT IS WORTH MONEY.

Cut out this slip, enclose with 5c and mail it to Foley & Co., 2835 Sheffield Ave., Chicago, Ill., writing your name and address clearly. You will receive in return a trial package containing Foley's Honey and Tar Compound for coughs, colds and croup; Foley Kidney Pills for kidney and back, rheumatism, backache, kidney and bladder ailments; and Foley Cathartic Tablets, a wholesome and thoroughly cleansing cathartic for constipation, biliousness, headaches and sluggish bowels.—Advertisement.

## SUSPENDED PRIEST LOSES DAMAGE SUIT

JERSEY CITY, N. J., Feb. 16.—Father Francis J. Sexton, lost his suit for \$105,000 damages against Eugene E. Kinkead, Thomas J. Maloney and Thomas J. Stanton, of Jersey City, and Hugh Montague, of Passaic, who he charged with defamation of character.

Father Sexton, who is under suspension by the Catholic church, charged that the four defendants had defamed him of misappropriating \$2,000 of the fund of the American Association for the Recognition of the Irish Republic, of which he was treasurer.

## USE SLOAN'S TO WARD OFF PAIN

LITTLE aches grow into big pains unless warded off by an application of Sloan's. Rheumatism, neuralgia, stiff joints, lame back won't fight long against Sloan's Liniment.

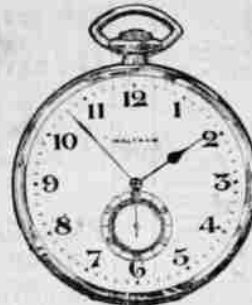

For more than forty years Sloan's Liniment has helped thousands, the world over. You won't be an exception. It certainly does produce results. It penetrates without rubbing. Keep this old family friend always handy for instant use. Ask your neighbor.

At all druggists—35c, 70c, \$1.40.

## MOVIE OWNERS PLAN BOYCOTT

Stars Under Cloud Will Not  
Appear on Screen in  
New York State

ALBANY, N. Y., Feb. 16.—A resolution calling for the members of the New York State Motion Picture Theatre Owners' association, now in session here, to agree not to show any pictures in which appears a star or a performer who has been proved to be immoral or who has been involved in any kind of indecent or immoral action, was passed unanimously by that organization here today.

William Brandt, of New York City, introduced the resolution, saying he believed its adoption would go far in alleviating what he termed was a growing impression that everyone connected with the motion picture industry was immoral and would be a means of offsetting the notoriety to the industry caused by the recent slaying of William Desmond Taylor at Los Angeles. The resolution itself called attention to the fact that the movie owners themselves had ruled from the screen Arbuckle pictures as well as those featuring Clara Hamon and Fred Beaumont.

A resolution went on record as opposed to drives, campaigns, or "special weeks" which they claimed were getting to be "so common as to become a nuisance."

A resolution that the association should extend their co-operation to Will Hays, who soon is to become the director general of the motion picture producers, was tabled.

A two-hour discussion, a resolution was adopted demanding a reduction of not less than 13 1/3 per cent from the 1920 prices on existing film contracts.

## AVIATOR PLANS RECORD FLIGHT

Lieut. MacReady Will Try  
to Better Altitude Mark  
of 40,800 Feet

DAYTON, Ohio, Feb. 16.—In the face of expression of doubt that a much greater altitude could be reached and declarations that the rarity of atmosphere at great heights probably would cause ruptures of the tissues of the human body, Lieut. J. A. MacReady today announced that he is planning to attempt to better the world's airplane altitude record of 40,800 feet which he established here last September.

Army air service engineers at McCook field here are constructing a new super-charger, more powerful than ever used, for Lieutenant MacReady's flight. He did not announce the date of the proposed flight.

While some engineers and aviation experts at the field expressed opinion that an altitude of 55,000 feet might be reached, others pointed out that the thin atmosphere at this height probably would be insufficient to support the plane and dangerous to the pilot.

After his record flight last September MacReady announced that he had reached the "ceiling" at 40,800 feet where his machine hung stationary, but said today that he hoped different atmospheric conditions would allow him to go higher in his next trial.

GAMBLING TOPS GO FAST

LONDON.—Brass foundries in England are working overtime putting out "Put and Take" gambling tops to meet the demand. Two million new tops a week are produced, many for export.

## Extra Precautions

But at no added cost  
to YOU

MILK is part of almost every meal served in this city. Isn't it doubly important that this vital food be of unquestionable purity and quality?

Borden's Evaporated Milk is a brand on which you can safely rely. For Borden's is produced under the most exacting regulations. Borden dairies are famous for their cleanliness and for the careful inspection at every process in the manufacture of Borden's Evaporated Milk.

Borden's is pure country milk with the cream left in—delicious for household use.

And though your grocer sometimes pays more for it, he is anxious to please you by offering Borden's at the same price with other standard brands. Ask him for it.

## THE NUT BROTHERS (CHES AND WAL)

YOU SAY SANDY MCNAB WAS A CLOSE FRIEND OF YOURS?

YEH, HE WOULDN'T LEND ME A DIME!

was intimated in the testimony brought out by Attorney W. W. Clark of the United States Steel corporation, on Mr. LaVentre's cross examination. The case official admitted that in selling farm implements, the company allowed freight on its sales up to 20 cents per hundred pounds for long distances. The system worked, Mr. Corlett showed, to give customers at a certain distance receiving an allowance of freight

an advantage over certain other customers who paid the full freight, the Racine base price being the same.

6000 OYSTERS A DAY  
PARIS.—A cafe-restaurant on the outer boulevard has been serving between 5000 and 6000 oysters a day since the New Year holidays. Never in the memory of the proprietor has his public spent so lavishly on food.

pimples  
and  
boils  
are caused by  
errors of diet

## Fleischmann's fresh yeast corrects the cause

The familiar tin-foil package with the yellow label is the only form in which Fleischmann's Yeast is sold

A well-known skin specialist says that pimples are "signal flags of danger" often indicating errors in diet.

Indeed pimples are so frequently associated with faulty habits of eating and improper digestion that the first thing to do is to see that our food is right.

Fresh yeast is a wonderful corrective food for these skin disorders. Fleischmann's Yeast is rich in the elements which improve appetite and digestion and which keep the intestines clean of poisons.

Physicians and hospitals all over the country are recommending Fleischmann's fresh yeast for pimples and boils. It gets right at the basic cause of these complaints.

Eat 2 to 3 cakes of Fleischmann's fresh yeast daily before or between meals to keep your skin healthy. Place a standing order with your grocer.
